- Agriculture
- Non-Profit

**Averiware** is a fully-integrated business management solution developed for small and mid-sized companies who need Sales Force Automation (SFA) Customer Relationship Management (CRM), Supply Chain Management (SCM), Human Resource Management (HR), e-Commerce, web storefront, Financial Management (FM) and Accounting. It is available as both an ASP version, delivered over the Internet, or as a licensed version.

Averiware is coded in Java, which makes it executable on almost any hardware platform and Operating System. Because our solution is integrated, there are no custom programming hassles and expenses. In fact, you will not need to install any special software on any of your employees' machines - all they need is an Internet Explorer browser 5.5 or higher and an Internet connection. And because our solution uses the Internet, the location of your employee or division is not important. Here are some of the benefits you can enjoy:

- Immediate update of real-time information throughout the Averiware application, including e-Commerce, Customer Commerce, Relationship Management, Supply Chain Management, and Financial and Human Resource modules
- Averiware is fully accessible from a web browser, without the need for additional software because Averiware is 100% Pure Java
- Software-as-a-Service (SaaS) architecture reduces operational complexities, capital equipment outlays and IT expenses
- Integrates with your existing environment because Averiware is platform and operating system Independent
- All the power of full-featured ERP and CRM systems combined featured with the simplicity of a personal finance application
