Desktop plan is limited to 10 workspaces, other plans offer unlimited workspaces. 4.) There is no limit to the maximum file size that SugarSync can support. There are two exceptions where file size affects certain features: When you are accessing a file from another computer, you cannot download a file greater than 2 GB. This limit does not apply to the case where two (or more) folders are fully replicated between two (or more) computers. From your Personal Website, you can only upload files smaller than 100 MB. Generally, it's better to upload large files of this size through the SugarSync Manager since you do not have to worry about losing your network connection while you are uploading. SugarSync has a built in very reliable retry mechanism to ensure reliable uploads even under unreliable network conditions. 5.) A maximum of 5 files at one time for Pro and Biz Plus accounts. 6.)
